KONGU POLYTECHNIC COLLEGE, PERUNDURAI - 638060

INDUSTRIAL VISIT

KANAVU STARTUP VILLAGE

PRESENTED BY:

MANOJKUMAR P

25502510

INTRODUCTION TO INDUSTRIAL TRAINING

Industrial training connects classroom learning with real-world work.

- Understand startup activities
- Learn about innovation and entrepreneurship
- Explore technology applications
- Study software development and business planning

KANAVU STARTUP VILLAGE – COMPANY PROFILE

- Location: Annamalaikottai, Sivagiri, Erode
- Founders: Karthi Easwaramoorthy and Chitrabanu Duraisamy
- Supports rural entrepreneurs and new business ideas
- Provides mentorship, workspace and networking
- Tagline: “Dream. Start. Grow.”

MISSION, VISION AND CORE ACTIVITIES

Mission: Create opportunities through technology and entrepreneurship.

Vision: Encourage startup growth in rural areas.

Core activities:

- Startup guidance and mentorship
- Skill training and digital solutions
- Innovation and community development

INTRODUCTION TO INFO POWER

- Info Power is an incubated venture associated with TBI@KEC.
- **Sector:** Public transportation
- **Website:** infopowerindia.com
- Technology can improve transport safety and reliability.
- **Focus:** smarter and more efficient public transport

TBI@KEC AND STARTUP SUPPORT

TBI@KEC supports technology-based startups.

- Infrastructure and laboratory facilities
- Technical mentoring and business guidance
- Funding assistance for eligible innovators
- Prototype development and market validation
- Industry and investor connections

TECHNOLOGY IN PUBLIC TRANSPORTATION

Intelligent Transportation Systems (ITS) use digital technology to improve transport.

- GPS vehicle tracking
- Passenger information and electronic ticketing
- Vehicle monitoring and route management

Workflow: Vehicle → GPS/Sensors → Network → Server → Passenger Information

GREEN COLLAR AGRITECH – COMPANY INTRODUCTION

- Industry: Agriculture and Agritech
- Focus: AI, machine learning and data science
- Incubation ecosystem: IISc, TNAU and KEC
- Main product: TARAM
- Aim: Improve agricultural quality assessment and food safety

MISSION, VISION AND OBJECTIVES OF GREEN COLLAR

Mission: Improve agricultural quality, safety and sustainability.

Vision: Combine technology with agricultural knowledge.

Objectives:

- Assess commodity quality
- Support predictive agriculture
- Improve market access for farmers and FPOs
- Support food safety and commodity trading

AI, MACHINE LEARNING AND DATA ANALYTICS

- **AI:** Enables computers to perform intelligent tasks.
- **Machine Learning:** Finds patterns in data and supports predictions.
- **Data Analytics:** Converts data into useful information.
- Predictive analytics estimates possible future outcomes.

Applications: Crop monitoring, quality assessment and farm decisions

TARAM AND AGRICULTURAL QUALITY ASSESSMENT

- TARAM is a portable agricultural commodity quality assessment solution.
- Supports faster quality-related decisions
- Helps assess products closer to where they are handled
- Useful for food safety and commodity trading

Workflow: Commodity → Analysis → Data → AI/Analytics → Quality Result

PREDICTIVE AGRICULTURE AND FOOD SAFETY

Predictive analytics can identify possible quality risks early.

Process: Data → Processing → ML Model → Prediction → Action

Food safety uses:

- Quality testing and product monitoring
- Data analytics and supply-chain traceability

Value chain: Farmer → Processor → Trader → Consumer

PROPOSED STARTUP: CODESPHERE SOFTWARE SOLUTIONS

- **Type:** Proposed software development startup
- **Customers:** Small businesses, institutions and individuals
- **Services:**
    - Business and student management software
    - Customer and inventory records
    - Billing, invoices and reports
- **Goal:** Affordable, user-friendly software

CODESPHERE: TECHNOLOGY, WORKFLOW AND BUDGET

Technology: HTML, CSS, JavaScript, Python/Node.js and MySQL.

Workflow: Requirements → Design → Development → Testing → Deployment

- Initial setup estimate: ₹70,800
- Monthly operating estimate: ₹64,000
- Team roles: Software Developer, UI/Web Developer, Marketing & Support

CONCLUSION

- Kanavu Startup Village supports entrepreneurship and innovation.
- Info Power and TBI@KEC connect technology with transport and startups.
- Green Collar Agritech applies AI to agricultural quality assessment.
- CodeSphere proposes affordable software services.
- The training improved understanding of technology and business planning.

THANK YOU
